BUSINESS OVERVIEW

Business: Zano Market Pty (Ltd)

Industry: E-commerce

Location: KwaZulu-Natal, Durban, South Africa

Category: Online Marketplace

Website Status: Website Design Project

Website published on: <https://github.com/legionxgamerpro-arch/ST10516368-Part-3>

Live website published on: <https://legionxgamerpro-arch.github.io/ST10516368-Part-3/>

WEBSITE CHOICE

Name: Zano Market

Organization Description:

Zano marketplace is a small, rented space which is community driven. Platform serves local vendors and entrepreneurs, allowing them to sell products and highlight their talents. We also target customers seeking locally produced products by increasing their accessibility. Our mission is to empower local businesses and strengthen community connections one order at a time.

We are one of few businesses that focus on promoting economic growth and encourage sustainable entrepreneurship by providing local vendors and entrepreneurs with a cost-effective platform to sell products and grow their businesses responsibly, which sets us apart from our competitors.

We offer a highly diverse product range supplied to us by local vendors, entrepreneurs and artisans including fresh produce, clothing and Potter and Accessories which are all made with natural ingredients and recycled materials packed in durable eco-friendly packaging.

Reasons for Choosing the Organization:

The reason I created this community driven marketplace is because it promotes economic growth and supports sustainable entrepreneurship by providing its local vendors and entrepreneurs with a cost-effective platform to sell their products and a chance to grow their businesses responsibly. The business makes it possible for community members to have ease of access to diverse local products.

WEBSITE GOALS AND OBJECTIVES:

Goals and Objectives

- Enhance user experience by improving the site speed and navigation to make shopping easier for customers.
- Increase Sales Revenue by improving product pages, images, and descriptions.
- Generating leads by adding signup forms like newsletters and account registration.
- Enhancing brand visibility and Building trust by improving search engine rankings and including testimonials to build credibility.

Key performance indicators (KPIs) to measure success:

- Conversion rate: This will be the percentage of viewers on the website who complete a desired action such as buying a product or filling out a form.
- Traffic Sources: This will identify where viewers originate e.g., search engines, social media, and ads. This will help to measure Search Engine Optimization (SEO) success and ad performance.
- Average time on page: Measuring viewers' engagement by tracking their time spent on the site or specific pages.
- Bounce Rate: This percentage of viewers who leave the website after only viewing one page, a high rate may indicate poor user experience or irrelevant content.
- Page load time: This is the speed at which a page loads which is critical for user experience and SEO rankings.
- Return on Investment (ROI): This will be the overall profitability of the website in relation to its cost.

TIMELINE AND MILESTONES:

Part 1- Timeline and Milestones

Week 1 Research and planning

- Created a small business called Zano Market
- Identified problems faced by the Marketplace
- Researched solutions and impact a website could have on its operations , visibility and success.
- Researched and compared similar websites to the bussiness
- Identified two extra pages to add to the website
- Finalized and subbmited my website proposal

Week 2 Website Development

- Started coding the Home , About, Contact, Products and Vendor pages with basic layout and navigation
- added forms and product lists

Week 3 Testing and fixes

- I began to test the responsiveness of web pages, links ,validated contact and registration forms to ensure everything works properly.
- Completed tests and fixes

Week 4 Submission

- Finalized and Submitted my Website project to College for final evaluation

Part 2- Timeline and Milestones

Week 5 Planning CSS

- Decided on my website layout (Header , Body , Footer and Cards)
- Choose a color scheme and fonts for website
- Identified areas of website that need styling

Week 6 Basic CSS setup

- Created CSS file (Style.css)
- linked CSS file to all my webpages (HTML)
- I applied styles such as background colour, fonts, padding and margins.

Week 7 Layout Design

- I made use of Flexbox and Grid for layout
- I aligned my navigation bar
- I created responsive sections

Week 8 Styling Components

- I began to style forms , buttons and cards
- I added hover effects
- improved spacing and alignment of content.

Week 9 Implementing Responsiveness

- I added media quires for both mobile and tablet
- I then tested out the media quires to see results on different screen sizes.

Week 10 Testing and Fixing

- Checked design consistency (Header , Main and Footer)
- I fixed some layout issues (Product cards not displaying well)
- Adjusted font colour and size to improve usability and readability

Week 11 Submission

- Finalized and began submission of website project
- I uploaded my website project onto GitHub
- I submitted website project to College for final evaluation.

Responsive images	Images size and resolution are automatically adjustable to fit different screen sizes and devices.

WEBSITE PAGES AND CONTENT

A. Home Page

Features and Functionality

The function of the home page is to introduce the website, attract attention and to guide viewers to other pages of the website.

Colors

- Gold Background
- Gray Navigation bar
- Gray Footer
- White text, gold headings

How it functions

- It contains a navigation bar that links to other pages on the website.
- Highlights the businesses products.

Content It Contains

- Website logo and name
- Slogan
- Summary of main activities of the business
- Links to other pages
- Images of products sold by vendors (clothing, food, handcrafts)
- Contact details
- Social media links (Facebook, Instagram, TikTok)
- Copyright

B. About Page

Features and Functionality

The function of the about page is to provide information about the business, its purpose, and the people behind it. The page also helps the business to build trust with its users.

Colors

- Gold Background
- Gray Navigation bar
- Gray Footer
- White text, gold headings

How it functions

- The page shares images, names of team and founder
- Displays information in sections (mission, vision and about us), information can be used by users to verify legitimacy of business.
- It can be accessed from the navigation bar.

Content It Contains

- Map location of business.
- Mission and vision statements
- Background information about the business
- Information about the team and founder of business
- Links to other pages
- Social media links (Facebook, Instagram, TikTok)
- Email address and phone number.

C. Contact Page

Features and Functionality

The contact page allows its users to communicate with the businesses support team.

Colors

- Gold Background
- Gray Navigation bar
- Gray Footer
- White text, gold headings

How it functions

- It has a contact form where users can fill out their name, email, message, and mail to address.
- To send message users must type inside message box and then click submit.

Content It Contains

- Links to other pages
- Email address and phone number.
- Social media links (Facebook, Instagram, TikTok)
- Copyright

D. Products Page

Features and Functionality

The product page displays the products being sold and allows users to browse, compare and purchase items.

Colors

- Gold Background
- Gray Navigation bar
- Gray Footer
- White text, gold headings

How it functions

Allows users to:

- Browse categories.
- Check prices and compare.
- Add items to cart or Wishlist.

Content It Contains

- Description of the products
- Product images, name, and price
- Links to other pages
- Social media links (Facebook, Instagram, TikTok)
- Email address and phone number.
- Copyright

E. Vendor Page

Features and Functionality

The vendor page allows users to register to become a seller on the platform.

Colors

- Gold Background
- Gray Navigation bar
- Gray Footer
- White text, gold headings

How it functions

- Requires users to fill out a registration form with their personal and business details.
- After completion of registration there is an approval process.
- Once approved the system informs users and registers them as a vendor on the platform.

Content It Contains

- Registration form
- Brief explanation of why you should become a vendor of the website.
- Instructions on how to register.
- Links to other pages
- Social media links (Facebook, Instagram, TikTok)
- Email address and phone number.
- Copyright

DESIGN AND USER EXPERIENCE

Color scheme

Goldenrod	Goldenrod	goldenrod	White (f5efef)
Primary Accent	Background	Headings	Text

Typography

Headings Font	Times New Roman: Suitable for Marketplace name, page titles and for hero section text.
Body Copy Font	Sans-serif: Which is readable for descriptions and content on website
Font Hierarchy	H1: 25px-40px. H2: 20px-30px. H3: 17px-25px

Layout and Design Approach

- **Navigation structure:** The website has a well-organized header section and navigation bar that allows users to easily browse and access other web pages.
- **Product Display:** Products are displayed using a clean grid layout.
- **Responsive Layout:** The website can be viewed in different screen sizes and provides consistent experience for users on mobile, tablet, and desktop.
- **Forms:** Fully functional forms allowing users to input data and send.

User Experience Considerations

- **Easy navigation:** Clear navigation bar with links and footer section with links making it easier for users to navigate to one website after another.
- **Product Information:** Products have descriptions, prices and ratings to help customers make informed decisions.
- **User-friendly forms:** contact and registration forms are labelled and easy to complete.
- **Page load times:** Page is optimized to reduce load times and improves browsing experience for users.

TECHNICAL REQUIREMENTS

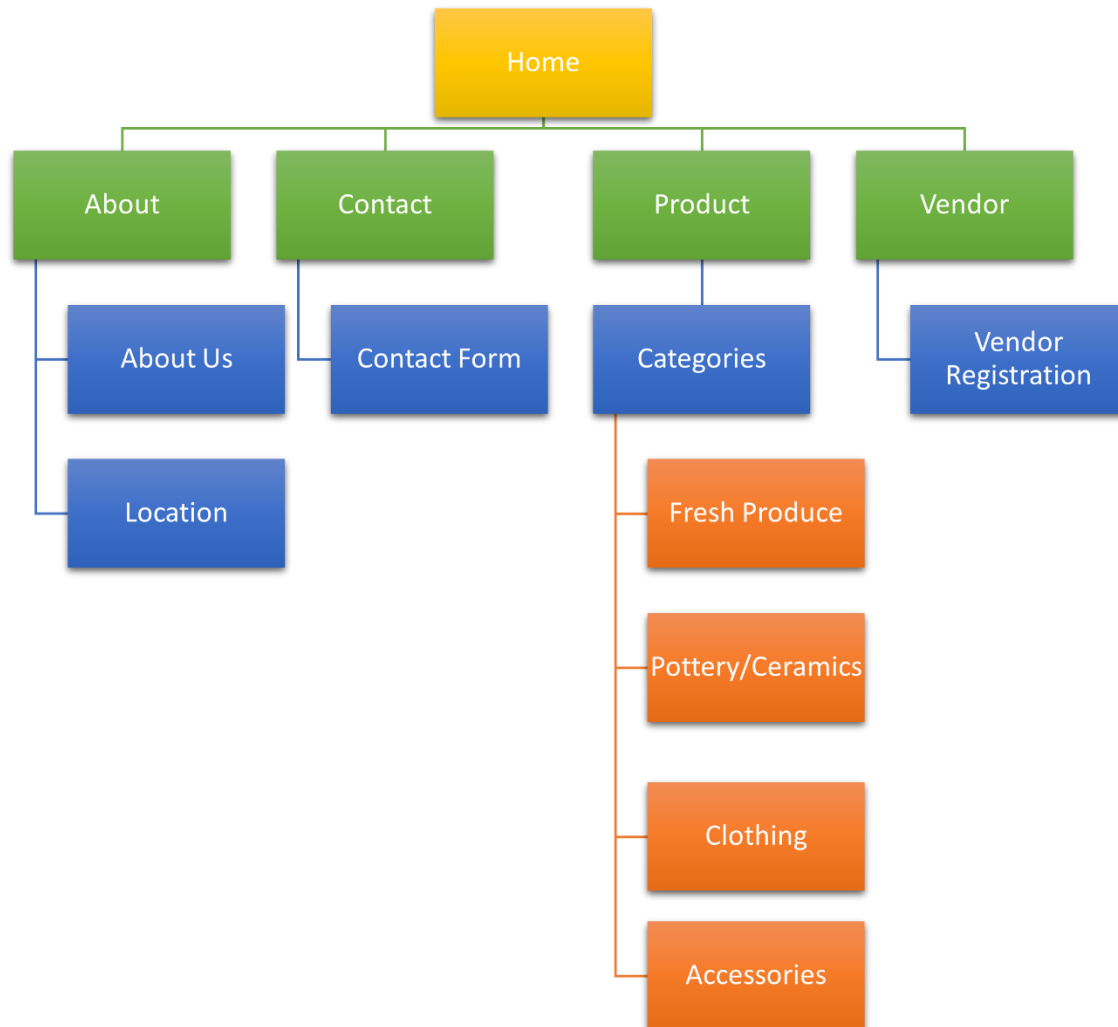

Hosting and Domain

Domain Name	www.zanomarket.co.za
Domains Registrar	Domains.co.za
Email hosting	Professional email example (sales@ZanoMarket.co.za) via Afrihost.com
